A. 吳志華: steroid 可正常, ACTH 可正常
3. Q. 以林立偉: 以 MIDSO 來 DDX delirium
A. 吳國光: Metabolic/Infectious Drug/Stroke / Others

(US comment)

- 以林立偉:
1. When accompany with PM we done more before
we should always be cautious and detailly evaluate
the patient.
2. US 林立偉:
Drug is always the most possible diagnosis of
delirium
3. US 林立偉:
Steroid psychosis may increase risk when increase
dosage. but may still have possibility in low
dosage steroid.

吳蘇銘: 吳許哲雲
