Q10 VS 鉴别診斷 = Most common causes of infantile colic?

A10 VS 鉴别診斷 = Lactose-intolerance, 牛奶蛋白過敏, GI hyper-motility. -- (6 months 不要喝 cow-b)

< EBM & Medical Ethics >

目前除非血便且軟, mucus (no colorectal polyp), 不建議 routine 做 rectal examination

< Key points >

1) PE 一定要讓 PI 顯著!

2) Repeat FAST echo of trans Hx + persistent Cx (4 hrs later)

< US Comment >

1) ER 之 History taking 要加強

2) Uvivity's abdominal pain 要特強
