

日期 103年 9月 11日

內容摘要：

(填寫說明：

1. 如有附件請註明，如簡報檔、全文檔等
2. 需有問題與討論：請註明姓名並包含醫學倫理及EBM之應用
3. 需有總結，請註明做結論者【主持人】姓名
4. 請自行編排頁碼)

六大核心能力

- 病人照護
- 人際溝通技能
- 醫學知識
- 從工作學習及成長
- 專業素養
- 制度下之臨床工作

Topic: Pediatric emergency.

主持人: VS 吳柏衡.

- (Q&A)
- Q1 VS 吳柏衡: How to assess the pediatric pt? disability.
conscious
eye contact
- R. 蔡可威: PAT (in checking appearance), ABCDE → exposure.
- Q2 VS 吳柏衡: What is PAT? appearance
breathway.
circulation.
- R. 李出穎: Appearance, work of breathing, circulation skin
- R. 林超華: The point of the appearance observation
- Q3 VS 吳柏衡: TICLS, G. (Tone, activity)
- Q4 VS 吳柏衡: How to assess the circulation:
- R. 蔡宇辰: Pallor, Mottling, cyanosis, finger nail refilling time.
- R. 林超華: How to use the PAT
- Q5 VS 吳柏衡: stable, Respiratory distress/failure, CNS dz, cardiopulmonary dz / failure.
- Q6 VS 吳柏衡: The normal range of the breathing rate of child.
- R. 施晉堯:
- | Age | RR |
|-------------|---------------|
| Infant | 30 to 60 |
| Toddler | 24 ~ 40 (考步期) |
| Preschooler | 22 ~ 34 |
| schooler | (小學以後) |
| Adolescent | as adult. |

內容摘要 (續):

- Q7 V: 吳柏衡: How to assess the BP.
R: 劉邦民: 0-1 y/o: 60-70, 1-12: $70 + \text{Age} \times 2$ (SBP).
- Q8 V: 吳柏衡: Disability assessment?
R: 林怡芸: AVPU,
- Q9 V: 吳柏衡: What is the caution while exposure?
R: 施廣泰: Keep pt warm, avoid hypothermia.
R: 林怡芸: What is the caution while we face a respiratory distress pt.
- Q10 V: 吳柏衡: If the appearance & circulation were fine, provide the oxygen support, avoid the IV to decrease agitation.

(EBM:)

V: 吳柏衡: IV steroid was proved to decrease the intubation rate, dose of dexamethasone is 0.15 to 0.6 mg/kg \Rightarrow (0.3 mg/kg).

(JMC:)

V: 吳柏衡: 各種 pediatric emergency 有年紀的限制, 常需 individualized patient's condition.

(VS conclusion:)

V: 吳柏衡: The presentation of dz in child is different to adult. The treatment & drug dose were also different, keep being to elaborate the ability to patient care.
