吳冠榮

vs H/O: what to include in a detail/concise PG examination?

吳 A) PG - 已有作的不要寫

Focused, but detailed

Meek - supple, Jolt test negative

pupil, EOM no limitation, No nystagmus

No facial palsy; No face numbness

No uvula tongue deviation

~~FF~~ FNF - no dysmetria, Gait

Mr SIS bil V/L/E, no numbness over limbs/trunk

Abd. Soft, epigastric tenderness w/o rebounding pain

(Jump can't induce pain)

P8. what are the detail(s) and communication to Pt during obs?

AS 重要病情解釋

P9. Important items before Pt discharge?

AS 出院

- Re-check vital sign

- Education

- 預約回診 (2天) - 約對人

小兒科約診 (12hr) - 1天 or 留觀

vs H/O: Ax required additionally for senior Pt?

R1 林 林哲華

Travel - Africa? Mountain?  
Occupation - 稻種  
Contact - 稻種  
Cluster.

認識發燒

所有症狀能解釋為一個診斷 最好的診斷

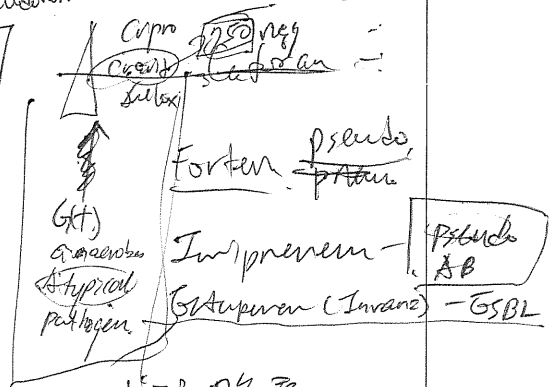

Ampicillin - Listeria

pipracillin pseudo  
4條

Ct. inda.  
Drelat. } MRSA.  
Bacter

clinda + penicillin  
✓  
neurology fascitis

Ceftriaxone - (me)

di 小孩月經痛  
1600 ppeels

紀錄者: 蔡宇承 R1

科 主任 王宗倫

Serotonin - syndrome. = SSRI induced. (Depression?)

+ standard, medical,

## EBM & Ethics

VS 林<sup>林立偉</sup> ~~what~~ Give me one example of inappropriate disposition of the patient?

陳<sup>陳穎玲</sup> A. Discharging paediatric pt with elevated, abnormal heart rate, or abnormal, unrelieved symptoms.

VS 林<sup>林立偉</sup> what was there to do when such thing happens?

陳<sup>陳穎玲</sup> B. Contact the patient to return ER for further lab study, measurement and observation.

## Key points

- (1) Inappropriate tx taking may lead mis-diagnosis.
- (2) Missed look vital status may delay tx and lead to worsened outcome.
- (3) Important skills on approaching young females regarding pregnancy shall never be overlooked.

## is Comment

VS 林<sup>林立偉</sup>

- (1) A careful, detail tx taking with all relevant information requires broad knowledge from studying and updated medical readings.
- (2) Only a good information gathering can lead to correct direction on diagnosis without delayed tx.
- (3) Do not send pt home before his/her vital sign stabilized with resolved symptom/sign.
