

日期

103年10月7日 地點 = B2 同m

內容摘要：

(填寫說明：

1. 如有附件請註明，如簡報檔、全文檔等
2. 需有問題與討論：請註明姓名並包含醫學倫理及 EBM 之應用
3. 需有總結，請註明做結論者【主持人】姓名
4. 請自行編排頁碼)

六大核心能力

- ☒ 病人照護 ☐ 人際溝通技能
☒ 醫學知識 ☒ 從工作學習及成長
☐ 專業素養 ☐ 制度下之臨床工作

<主講者 = 王宗倫 主任> <Topic = AHA

Recommendation for

(Q2A) Q1: 王宗倫主任 = What's the finding interpretation of ECG of this ECG

A1: PGY 余弼斌 II、III、aVF = STE MI.

Q2: 王宗倫主任 = What else?

A2: R1 蔣可威 = RV infarct, 因 V4R > 0.5mm STE.

Q3: 王宗倫主任 = Anything else?

A3: R1 李岳穎 = 1° AV block, sinus bradycardia, and suspected posterior wall infarct

Q4: 王宗倫主任 = So what's your guess of this patient's lesion

A4: R1 蔣可威 = Proximal RCA lesion, 因 SA node 也可能受到影響.

Q5: 王宗倫主任 = What's the baseline used to measure ST deviation?

A5: R3 陳穎玲 = T-P segment.

Q6: 王宗倫主任 = What are the evolutionary changes of acute infarct.?

A6: R3 林吉博 = Hyperacute T → STE → Q wave → ST decline → T invert → (STD)

內容摘要 (續):

Q7: 王宗倫主任: What are the population for atypical presentations of ACS?

A7: 陳弘原: Old age, DM, Female patients.

Q8: 王宗倫主任: 有哪2種 disease 會造成 PR depression?

A8: R2 鄭凱文: Pericarditis, Atrial infarction

Q9: 王宗倫主任: What is NSTEMI (NSTEMI)?

A9: R2 吳冠蓉: STE not meeting criteria, STD, T invert, No anomalies at all

Q10: 王宗倫主任: What's the recommendation for V2, V3 STE?

A10: R2 望邦民: $<40\%$: 2格半, $>40\%$: 2格, 女性: 1格半

<EBM>

王宗倫主任: What the level of evidence for primary PCI in STEMI?

R2 施廣泰: Grade 1 recommendation (IA)

<Key point>

1. Don't abuse reciprocal change.
2. History is as important as ECG.
3. Twave size is relative to QRS.

<VS Comment> (王宗倫主任)

1. If you do the ECG, must interpret by yourself
2. If in doubt, consult a VS nearby
3. History, S/S is very important!

紀錄者: R2 蔡可威
